

Authority and Gender in Medieval and Renaissance Chronicles

This volume is an attempt to discuss the ways in which themes of authority and gender can be traced in the writing of chronicles and chronicle-like writings from the early Middle Ages to the Renaissance. With major contributions by fourteen authors, each of them specialists in the field, their studies span full across the compass of medieval and early modern Europe, from England and Scandinavia to Byzantium and the Crusader Kingdoms, embrace a variety of media and methods, and touch evidences from diverse branches of learning such as language and literature, history and art, to name just a few. This is an important collection which will be of the highest utility for students and scholars of language, literature, and history for many years to come.
