

Agenda 21: An Expose of the United Nations Sustainable Development Initiative and the Forfeiture of American Sovereignty and Liberties (With Important 2030 Agenda Updates)

Agenda 21: An Expose of the United Nations Sustainable Development Initiative and the Forfeiture of American Sovereignty and Liberties explores how climate control will be used by the United Nations to bolster its position as a one world government and potentially usurp national sovereignty as well as individual rights. This book has been formatted for optimal use on your Amazon Kindle Reader and the various free Kindle apps. From the text: There is a new age dawning in America and around the world that promises to change everything you know and the values you hold dear. The values we hold dear, like life, liberty, and the pursuit of happiness form the foundation of who we are as a people and a nation. Our traditions and laws are based on these values and were originally designed to preserve human dignity. In my opinion, human dignity is as vital to life as the air we breathe and the water we drink. Without it, life perishes. As you will discover in this book, Agenda 21 believes you are a nuisance. Your very existence represents a stumbling block to a master plan that equates human life to a colony of ants, where the rights of the individual and human dignity are defined by servitude, not freedom, and where personal ambition must be expended for the greater good. We face a host of pollution and sustained development challenges, but in my opinion many of these issues can be met with free market solutions. We do not need the bloated bureaucracy of the United Nations dictating policy at the national and local levels. Let them focus on hosting summit meetings that promote world peace, and leave the rest of us alone. Agenda 21 is a carefully disguised attempt to hijack the worthy cause of environmentalism in the pursuit of political objectives. As one signatory to the United Nations General Assembly among at least 193 others, the initiatives being put into place in the name

of sustained development represent a threat to our national sovereignty. If the citizenry of the various nations that prize freedom and self-governance do not resolve to stop the United Nations in its tracks, we will all be answering to the same handful of elites whose selfish pursuit of utopia will relegate the vast majority of the worlds population to a life of servitude and limited opportunity.
