

History of the Intellectual Development of Europe, Vol. 1 of 2 (Classic Reprint)

Excerpt from History of the Intellectual Development of Europe, Vol. 1 of 2 At the meeting of the British Association for the Advancement of Science, held at Oxford in 1860, I read an abstract of the physiological argument contained in this work respecting the mental progress of Europe, reserving the historical evidence for subsequent publication. This work contains that evidence. It is intended as the completion of my treatise on Human Physiology, in which man was considered as an individual. In this he is considered in his social relation. But the reader will also find, I think, that it is a history of the progress of ideas and opinions from a point of view heretofore almost entirely neglected. There are two methods of dealing with philosophical questions - the literary and the scientific. Many things which in a purely literary treatment of the subject remain in the background, spontaneously assume a more striking position when their scientific relations are considered. It is the latter method that I have used. Social advancement is as completely under the control of natural law as is bodily growth. The life of an individual is a miniature of the life of a nation. These propositions it is the special object of this book to demonstrate. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical

works.
