

## Quilting On Mars

Earth was sinking into social and economic decay. Those with means left Earth to live on Mars, the only human outpost in the solar system, to start life anew. Through chance and serendipity, it was a colony of mostly of quilters, many widows and few couples, that inhabited this new world. There was a surprise that awaited on Mars, one that nobody would ever suspect. A mystery overshadowed the colony, one that would change everyones life forever.
