

Contemporary Cryptology (Advanced Courses in Mathematics - CRM Barcelona)

The aim of this text is to treat selected topics of the subject of contemporary cryptology, structured in five quite independent but related themes: Efficient distributed computation modulo a shared secret, multiparty computation, modern cryptography, provable security for public key schemes, and efficient and secure public-key cryptosystems.

[\[PDF\] The Constitution in Exile: How the Federal Government Has Seized Power by Rewriting the Supreme Law of the Land](#)
