

Indocrypt began in the year 2000 under the leadership of Bimal Roy and - docrypt 2005 was the sixth conference in this series. This series has been well accepted by the international research community as a forum for presenting high-quality cryptography research. This year a total of 148 papers were submitted for consideration to the Program Committee and after a careful review process, 31 were accepted for presentation. We would like to thank the authors of all submitted papers, including those that were accepted and those which, unfortunately, could not be accommodated. The reviewing process for Indocrypt was very stringent and the schedule was extremely tight. The Program Committee members did an excellent job in reviewing and selecting the papers for presentation. During the review process, the Program Committee members were communicating using a review software developed by Bart Preneel, Wim Moreau and Joris Claessens. We acknowledge them for providing the software. The software was hosted at I2R, Singapore and we are grateful to Feng Bao and Jianying Zhou for allowing that. This year's conference was deeply indebted to Qiu Ying of I2R, Singapore, who took the responsibility of maintaining the review software and the server. Without his great cooperation Indocrypt 2005 could not have been possible. In this regard I would like to acknowledge the support of Tanmoy Kanti Das, Dibyendu Chakrabarti, Mridul Nandi, Deepakmar Dalai, Sumanta Sarkar and Sourav Mukhopadhyay for handling important administrative issues in the submission and review processes as well as for putting together these proceedings in their final form. We are also grateful to Palash Sarkar for his cooperation and guidance in Indocrypt 2005. The proceedings include the revised versions of the 31 selected papers. Revisions were not checked by the Program Committee and the authors bear the full responsibility for the contents of the respective papers. Our thanks go to all the Program members and the external reviewers (a list of them is included in the proceedings) who put in their valuable time and effort in providing important feedback to the authors. We thank V. Kumar Murty of the University of Toronto for kindly agreeing to present the invited talk. The talk has been included in the proceedings.
