

The Sky With Diamonds

It is the 1920s, an age of innovation and daring in transportation both on the road and in the air. At the forefront of motor-car development is Somervilles - to own a Somerville-bodied Rolls-royce is every mans dream. But when George Somerville has an accident that leaves him paralysed, the future of the firm looks uncertain. George has no sons old enough to manage the firm. He does, however, have a wife. Defying general skepticism and her own doubts, Julia gradually takes control, warding off takeover attempts with breathtaking skill and cunning. In Eliot Baring, an American employee and a brilliant airplane engineer, she sees a new future for Somervilles and, perhaps, for herself. Together they take Somervilles into the skies where competition is fierce and enemies common. But the skies darken as fascism spreads across Europe and Julias conscience becomes ever more important in Somervilles future. Beset on all sides, deserted by her colleagues - and lovers - her future looks bleak until help comes from the most unexpected quarter.
